OBJECTIVE

To develop a modern pulp processing and cold storage facility for guavas, mangoes, tomatoes, banana and dates.

INTRODUCTION

- Pakistan: World's top ten producer of fresh fruits and vegetables
- Approx. **30% - 40%** of fruits and vegetables are wasted due to absence of processing and storage facilities
- Agri-Sector contributes **20%** to National GDP and absorbs **40%** of the country's total labor force (MNFSR, FY 2015-16)

LOCATION

Ideally, such facilities are developed near the production area i.e **Larkano**, Hyderabad, Khairpur (SEZ)

Larkano is the largest Guava producing district of Pakistan that produces 40,000 tons of Guavas annually

Land required for the project: **4 acres**

CAPACITY

Processing unit along with a cold store facility:

Pulp/concentrate/puree plant capacity: **5,000-7,000** tons/season
 depending upon fruit

Cold Storage facility : **2,000** tons
